

CREATING THE 'WOW'

Our 25cm RGB LED **Sphere** light was specifically developed for the Kinetic Lights system.

The rotational molded sphere has a smooth opal surface with perfect light refraction characteristics.

The internal LED RGB fixtures features a novel light core design.

There is no need for active or passive cooling.

The brightness of our RGB LED **Sphere** is also suitable for shaded daylight applications.

Kinetic Lighting System from LM Productions

- Our amazing new Kinetic Lighting System, called by some a 'giant electric sky' is highly *controllable* and uniquely modular, and offers the flexibility to configure to your bespoke design.
- We can create beautiful waves of colour and movement, grabbing your Audience's attention and creating a 'WOW'; either as a temporary or permanent installation.
- Now available with over 100 pieces in stock and ready to go!
