Product Availability Planning Instantly see the status of your kit in real-time

Rely on Current RMS to tell you exactly what products are available for rent, whether the right kit is going out the door and when it's due to be returned so you can easily forward plan and maximise product utilisation. Powerful stock management allows you to react quickly to customer requests from any device and location.

- Drill down into individual items to resolve shortages
- ✓ Use the intuitive Job Planner to view all quotes and orders
- ✓ View all stock levels to effortlessly forward plan
- ✓ Increased team collaboration, prepping the same jobs simultaneously
- Free scan asset numbers or barcodes to quickly add items to a job
- ✓ Check-in kit from across all open Opportunities using Global Check-in

MailChimp Integration

Customer Relationship Management Keeping everyone connected at all times

Have a complete picture of all customer and colleague interactions with a CRM package specifically designed for rental. In one screen, you can access key customer information and create follow up activities, helping build relationships with all users, freelancers, clients and organisations.

- See full client history for all jobs and orders
- Upload attachments against contacts and organisations
- Create custom fields and views, helping analyse the data you need
- ✓ Make use of handy calendars and activity timelines
- Create customised Discussion Templates for internal and external communication
- ✓ Link organisations with Xero or QuickBooks Online to maintain one central list of contacts

Enticing Product Catalogue View and search across all of your stock

Easily sort and search via tag cloud, asset numbers or descriptions for any type of item or group of products in the enticing product catalogue. Presented with key stock information, such as quantity available to rent and sell, kit that needs repairing or replacing and your most popular items.

- ✓ See activities and a full history of individual items
- Use optional or mandatory accessories to build kits and packages
- Generate barcode labels to speed up picking and prep time
- Powerful rental charging including daily, weekly or fixed rate engines
- ✓ Use Serialised Containers to scan an asset and allocate all of its components
- Manage damaged stock, lost kit and sub-rents, returning all the right products

Manage all Crew, Transport, Venues and Rooms

Current not only manages the rental and sale of your products but it manages all the services that go with these jobs too. Whether that be your crew, transport, venues or rooms, the system covers it all. Use the intuitive Resource Planner to view all available resources and jobs with unallocated services.

- ✓ Flexible service charging; hourly, daily or by distance
- ✓ Simple allocation using drag and drop functionality
- ✓ Handy iCal feed for all resource bookings
- ✓ Specify periods of unavailability for all resources
- ✓ Use Stores to determine the whereabouts of resources
- Build a Venues database for places you deliver to frequently
