At Stuart Power, we understand the importance of environmental responsibility. Our fleet of low-emission, fuel-efficient generators and hybrid power solutions help clients reduce their carbon footprint while maintaining reliable power supply.

We are proud to offer environmentally friendly alternatives like battery energy storage systems, hybrid generators, and AdBlue technologies that comply with stringent EU Stage V regulations.

Our generators are fuel efficient, easy to operate and packaged in weatherproof sound-attenuated enclosures providing excellent noise reduction.

GENERATORS 800kVA TO 2000kVA

Our containerised generators are easy to transport, already mounted on trailers with fuel tanks connected. Emergency power requirements are easily handled by our experienced teams located at each depot. We will have you powered in no time.

These generators are designed using our skilled knowledge and are then custom-built. Available in 20ft, 30ft and 40ft containers, they are super silent and secure. With the additional functionality of synchronisation, we can offer multi-megawatt solutions ideal for large site operations.

Our skilled engineers and account managers can perform site surveys, ensuring we deliver your project correct, on time and on budget. With a range of bulk fuel tanks, cables, load banks and transformers available, we can deliver and install every aspect of your project.

Whether for a planned or an emergency outage, you can rest assured we will have the right solution to suit your needs.

SECURE CONTAINER GENERATORS

IDEAL INDUSTRIES INCLUDE:

SHIPPING

CONSTRUCTION

TELECOMS

UTILITIES

PETROCHEMICAL

Our range of secure containerised generators offers site solutions when safety is a concern plus the added environmental benefit of the complete unit being bundled. It is not surprising that more sites are switching to this compact solution. Each container is custom-built with a large fuel tank and is available with open or closed generator canopies.

We also provide site distribution boards, cables, transformers as well as installation to facilitate your site power requirements.

SAFE AND SECURE

Four lockable door bars, a heavy duty lock box, adjustable cable exits with securing pins, cable clamps and fill/vent pipes fitted with a heavy duty grill means this product symbolises security.

GENERATORS STAGE V

Authorised Dealer

EU V Compliant Generators

Stage V FG Wilson PRO range are reduced emissions generators that comply with EU Stage V Emissions Regulations.

Expertly engineered to meet stringent emissions standards for mobile applications and clean air zones, these advanced generators deliver reliable power while prioritising environmental responsibility.

Sound attenuated enclosures have excellent noise reduction making them suitable for residential projects and any other application where silent power is a must.

STAGE V TECHNICAL GENERATORS

Powered by
STAGE V

SCR

Selective Catalytic Reduction

A fine spray of AdBlue solution is mixed with exhaust gases. A special ceramic catalyst uses this solution to convert nitrogen oxide NOX into nitrogen and water.

AdBlue is a colourless liquid made up of high-purity urea (32.5%) and deionised water (67.5%)

Thermal Management

Thermal management of the aftertreatment is very important. A DPF requires raised temperatures for the regeneration process to burn off soot particles. Additionally, the selective catalytic reduction process requires raised temperatures for the catalytic reaction and to remove urea deposits.

INTELLIGENT BATTERY ENERGY STORAGE SYSTEM

Stuart Power's fleet of Intelligent Battery Energy Storage Systems (IBESS) help to reduce fuel costs, meet sustainability targets and reduce CO₂ and NO_x emissions.

Similar to hybrid car technology, these battery units have an intelligent control system that manages variable loads, allowing the generator to switch off during periods of low power consumption i.e. overnight.

The batteries will supply power silently during this period and the generator will automatically restart when the demand is high, or the batteries become depleted.

INTELLIGENT BATTERY ENERGY STORAGE SYSTEM

kVA	kWh	Length (mm)	Width (mm)	Height (mm)	Weight (mm)
45	80	2240	1160	2118	2000

GENERATOR BATTERY CHARGER

1x 1 PHASE 16A 240V

"How long will the unit last on a single charge?"

This is the most common question asked; and the answer depends entirely on how fast the stored energy is used up. Power usage is not always steady so it's difficult to be specific but, as a guide, this chart shows the typical duration based on average power use as a percentage of rated output.

Our teams will be able to answer any questions.

** Data shown is for a 30kVA Hybrid Power Unit

13

ERICA ENERGY MANAGEMENT & CONTROL

All our Intelligent Battery Energy Storage Systems come with an integral energy management and control system. It gives you access to live energy data and advanced, downloadable reporting.

Energy data is available by socket, identifying when and where energy is used which can highlight opportunities to reduce energy wastage, costs and carbon emissions.

The energy saving scheduler allows you to set on and off times for each day per switchable socket. By using the scheduler appropriately large savings in power can be made on-site, especially if no weekend working is needed.

BENEFITS

- ✓ MEASURE & UNDERSTAND SITE POWER USAGE
- ✓ MANAGE POWER TO REDUCE USAGE
- ✓ REDUCE DIESEL USAGE
- ✓ IMPROVE HYBRID BATTERY PERFORMANCE
- ✓ RECORD FAULT EVENTS TO AID MAINTENANCE
- ✓ AIDS CARBON REPORTING

Avg. sound pressure dB(A) @ 7m	58
Wind speed resistance (km/h)	110
Running time	167 hours

One of the lowest sound pressure levels in the industry; only 58 dB(A) at 7 metres.

The floodlights are powered with 48 Volts. No more high voltages on external cables. Safety is a must!

Thanks to the V20's fuel-saving features such as the small engine and the LED lamps, this model can run up to 167 hours without refuelling.

Connect two V20s and run just one engine.

The special shape of the adjustable stabilisers allows the operator to level the V20 in a few seconds.

Three doors for wider access. Two compass-top doors with wing shape provide complete access to the engine for safe and convenient maintenance.

REMOTE FUEL MONITORING

SMARTGUARD REMOTE MONITORING

SmartGuard is a cost effective fuel tank level monitor. The SmartGuard SG6-P is a remote device featuring an integrated capacitive probe for measuring fuel levels.

Level data is collected wirelessly using the mobile phone network and can be viewed and downloaded from a browser or via an API.

SMS and email alarms are server-generated for key events.

Should a tank's fuel level fall because of theft or a bad leak, the unit sends an alarm text message to the tank owner. At the same time data is sent to the internet and alarms are emailed to further recipients.

POWER ACCESSORIES

DISTRIBUTION BOARDS

Power distribution is another one of our key strengths. Our vast range of electrical distribution boards is available in both single-phase and three-phase. With such a varied range, we can ensure that any project is safely supported, with inputs and outputs from hardwire, powerlock, 125amp three-phase right down to 16amp single-phase.

Metal site boards are available from 32amp to 3200amp with customisable sockets to suit your needs.

POWER ACCESSORIES

CABLE RAMPS

5 channel heavy-duty cable ramps are suitable for many applications, providing protection to cables and hoses from vehicular and pedestrian damage.

CABLE RAMPS

CABLE RAMP	LENGTH	WIDTH	CHANNEL SIZE
Five-channel, heavy-duty	900mm	500mm	38mm x 5

JUNCTION BOXES AND LUGITS

Our compact junction boxes provide safe and secure connections for your on-site requirements. Suitable for 5 single core up to 240mm cable.

LUGIT is a safe and efficient alternative to the traditional junction box, creating temporary IP67 connections (when assembled correctly) or extensions to single core power cables that are terminated with copper lug terminals. Suitable for up to 300mm single core cable.

CABLES

We have extensive stock of all types of cable, including plug and socket, powerlock cables, lug end, multi and single core cable, providing for all your cabling needs. All our cable is H07RN-F double insulated, conforms to BS EN 7919 is flexible, and has the capacity to withstand our changeable weather conditions.

Our electrical distribution and cabling rental equipment undergoes a rigorous test and inspection regime prior to despatch.

23

POWER ACCESSORIES

LOAD BANKS

Generator load bank testing is essential to avoid your generator failing when you need it most.

We recommend load bank testing that will improve engine performance by clearing deposits in the combustion chamber, injector nozzles, piston rings, turbocharger, and exhaust system.

LOAD BANKS - AC RESISTIVE

EXTENSIVE GENERATOR SUPPORT SOLUTIONS IN JUST ONE CALL

01953 454540

enquiries@stuartpower.co.uk

ACOUSTIC BARRIERS

When noise is generated on site, the acoustic barrier membrane will absorb and reduce the degree of noise pollution. The barriers are lightweight and flexible, allowing for a simple and easy installation.

TEMPORARY FENCING

Need security and perimeter boundaries?
We stock Temporary Fencing & accessories to enable you to secure your site project.

SOUND

How it works

It has been developed using a composite of fibres that both absorbs and controls noise.

When noise is generated on site, the acoustic barrier membrane will absorb and reduce the degree of noise pollution.

25

FUEL MANAGEMENT SERVICES

We know the importance of keeping a site/project running at all times, so we offer a dedicated fuel management system that is run in-house.

Our teams will measure your fuel consumption effectively with the added benefit of ongoing checks. Our checks will monitor your power needs and should they increase or fall, we will offer advice accordingly.

Having our own specialised fleet of vehicles enables us to control deliveries and offer a 24/7 emergency refuelling service.

Regardless of where your generator or tank is located (UK Mainland) we have the solution for accessible deliveries, keeping your project fuelled and removing any unnecessary downtime due to running out of fuel.

SERVICES INSTALLATIONS

Our dedicated account managers are experienced in delivering full turnkey solutions.

These are carried out by our certified electricians and engineers and range from site survey through to design and installation.

REMOTE MONITORING

Our in-house remote monitoring system uses the latest technology available. With app solutions you will be able to produce detailed reports, and set up and monitor alerts for your generators anytime, anywhere.

We also offer GPS tracking, giving you an additional layer of security.

DSE Genset®

SPECIALISED LOGISTICS

Our range of in-house transport solutions is all ADR-compliant and FORS-accredited. They include front and rear mounted cranes across various vehicle types with crane lifting capacity from 23T/M to 65T/M, artic trailers, tractor units and 4x4s.

Our friendly professional drivers will connect the fuel tanks and provide a demonstration to get you started.

24/7

Keeping everything under one roof means we have total control, enabling us to offer a genuine dedicated 24/7 service. Emergency equipment, fuel, an engineer and logistics – we have it covered.

STAR DELTA STARTERS

SDS55i-415	55kW Star Delta Starter
SDS55-415	55kW Star Delta Starter

SOFT STARTERS

PSR72i-230	37kW ABB Soft Starter
PSR45i-230	22kW ABB Soft Starter

SEPARATORS

Separators are based on the need to find a solution to on-site requirements for a successful temporary oil and water separator. The system is based around a number of separation criteria all located in one contained unit. In essence, one oil/water separator utilises four separation stages.

IN PURSUIT OF EXCELLENCE **STUART POWER**

Established in 1982, Stuart Power has expanded to become one of the largest privately owned independent power generation rental businesses in the UK.

Recognising that our staff are critical to the overall success of the business, we invest heavily in ensuring that the team are fully trained and qualified to deliver our company values.

The safety of our employees and activities is paramount to the core principles of our business. We are continually investing and developing our practices to support our mission and our accreditation by trusted associations.

In addition to this, we work closely with FG Wilson as part of an ongoing process to ensure continuous improvement, and to respond to the changing needs of our customers.

We develop through adapting to our customers' requirements, and by ensuring that our Sales, Service and Operational activities always provide the most suitable solution.

Our dedicated team of highly skilled and knowledgeable individuals ensure the smooth running of your project and help deliver excellent results.
