# INTRODUCTION

Elite Ground Support Services Ltd is a market leading supplier of Specialist Non-Mechanical Plant and Equipment for both Sale and Hire.

*We believe in  
Building strong foundations together.*

“ At Elite GSS Ltd our aim is to provide our customers with unique and innovative products delivering the highest levels of performance and safety at all times. ”

*Kris Heard, Managing Director*

## Business as usual

Whether directly, or through one of our specialised partners, Elite GSS Ltd aim to supply a premium service, along with market leading products throughout the UK and European markets.

The strength of our relationships gives us an advantage to continue business successfully, ensuring all of our products and services meet the ever changing and demanding conditions within the industries we supply to.

## Our Philosophy

Our key philosophy is to listen and respond to our customer's needs and requirements.

We achieve this with our extensive industry knowledge and expertise, to provide our customers with high quality solutions for ease of use and safety, whilst also saving time and money.

## **TEMPORARY ACCESS & GROUND PROTECTION**

Our range of ground protection mats, roadway panels and event flooring products provide short and long-term access, for both small and large plant and machinery, over soft and sensitive ground.

## DuraMatt Lite Ground Protection Boards

The DuraMatt Lite Ground Protection Board provides a quick and effective ground protection and access solution, without the need for specialist lifting equipment.

## DuraMatt Medium Duty Access Mats

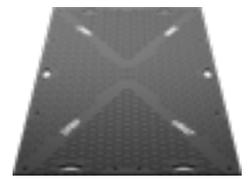

The DuraMatt Medium Duty Access Mats have been designed with unique surfaces for working on hard standing areas and sensitive grass.

## E-Mat Heavy Duty Access Mats

The E-Mat Heavy Duty Access Mats provide effective Temporary Access and Ground Protection for heavy plant and machinery.

## EuroTrak HD Heavy Duty Access Mats

The EuroTrak HD Access Mats have a highly engineered, non-slip traction surface, which helps reduce slippage even in the most challenging weather and ground conditions.

## Hardwood Timber Bog Mats

The Hardwood Timber Bog Mats are grown and manufactured in Europe to be hard wearing and effective when used as a Temporary Roadway and Access solution.

## K-Mat Heavy Duty Roadway Panels

The K-Mat Heavy Duty Roadway Panels are designed to provide Temporary Access and Ground Protection for extremely heavy plant and machinery.

## PortaPath™

The PortaPath is an innovative turf and surface protection system which is an excellent all-weather, all-year round alternative to traditional flooring systems.

## Safe Site Matting

Safe Site Matting can be easily adapted to fit around obstacles and has a simple but effective tongue and groove connection system, which also acts as an effective drainage solution.

## Safe Walk

Safe Walk Matting is a fast and effective solution for highlighting safe crossing points and aids social distancing for contractors and the public.

## Steel Road Plates

Providing safe cover for open trenches and excavations, used as both a short and long-term solution within groundworks or utility projects.

## Elite SitePath

The Elite SitePath is a hi-visibility industrial walkway solution perfect for use within factories and construction sites.

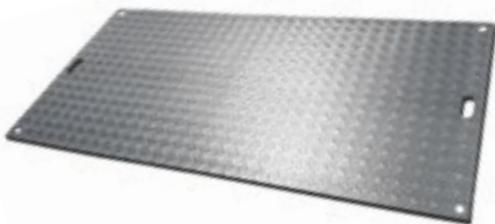

# DURAMATT LITE GROUND PROTECTION BOARDS

Our budget Ground Protection Board provides quick and effective surface cover and ground protection.

|                 |             |               |
|-----------------|-------------|---------------|
| <b>5 tonnes</b> | <b>32Kg</b> | <b>budget</b> |
| <b>Multiple</b> | <b>32Kg</b> |               |

The DuraMatt Lite Ground Protection Boards offer the flexibility and strength as a ground protection and access solution, without the need for specialist lifting equipment.

Ideal for lighter traffic use on either flat or solid surfaces. DuraMatt Lite provides effective access with a non-slip top traction surface and a smooth bottom surface. DuraMatt Lite is a great new alternative to old and inadequate materials such as plyboard.

A variety of Steel Fabricated Stillages are available

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 2.4m [L] x 1.1m [W] x 10mm [D]<br>Other sizes available (subject to minimum order quantities) |
| <b>Weight:</b>   | 32Kg  |
| <b>Load:</b>     | Suggested 5 tonnes, weight tested up to 10 tonnes (depending on ground conditions)            |
| <b>Material:</b> | 100% Recycled Low Density Polyethylene (LDPE) and 100% recyclable                             |
| <b>Colour:</b>   | Grey as standard. Other colours available (subject to minimum order quantities)               |

## Key Features

- ✓ Designed for use with light vehicles and pedestrians
- ✓ A quick and effective temporary access solution with easy installation
- ✓ 4 strategically positioned connection holes and 2 hand holes
- ✓ Durable, cost effective and long lasting
- ✓ Store with stillage or on pallets for ease of transport, distribution, containment etc.
- ✓ Temporary ground protection and access
- ✓ Walkways, Marquee, Event Flooring, Overflow Car Parks and Spoil Boards

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Used/second hand**
- **Buyback**
- **Lease or Finance**

## Additional Information

**Product Leaflet**

**Technical and Installation Guide**

**We advise not to use Steel Tracked vehicles with any composite mats unless pre-authorized and agreed beforehand, traversing and aggressive movement on the mats may cause damage to them and the connectors and this will be the sole responsibility of the customer and user of the mats.**

# DURAMATT MEDIUM DUTY ACCESS MATS

Designed for short and long term access, whilst also providing effective Ground Protection and reducing on-site, property and heritage damages.

Our DuraMatt Medium Duty Access Mats have been designed with a unique diamond non-slip traction surface on top and a smooth surface on the bottom for working on hard standing areas and sensitive grass.

 **max 15 tonnes**

 **34/17Kg**

A variety of Steel Fabricated Stillages are available

## Specifications

|                  |  |
|------------------|--|
| <b>Size:</b>     | 2.45m [L] x 1.23m [W] x 12mm [D]<br>Half size: 2.4m [L] x 0.6m [W] x 12mm [D]<br>Other sizes and colours available (subject to minimum order quantities) |
| <b>Weight:</b>   | 34Kg / 17Kg  |
| <b>Load:</b>     | Suggested 10-15 tonnes, weight tested up to 20 tonnes (depending on ground conditions)   |
| <b>Material:</b> | 100% Recycled Low Density Polyethylene (LDPE) and 100% recyclable  |
| <b>Colour:</b>   | Grey as standard. Other colours available (subject to minimum order quantities)  |

## Key Features

- ✓ Designed for use with light/medium plant and machinery but also for work personnel and the public
- ✓ Flexible nature to follow the contours of the ground to deliver highly effective access over undulating or sloping terrain
- ✓ 4 strategically positioned connection holes and 4 hand holes / 2 hand holes for the half size
- ✓ Low transportation and handling costs
- ✓ Avoids health and safety issues
- ✓ Avoids bogged down vehicles, saving valuable time and money

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Used/second hand**
- **Buyback**
- **Lease or Finance**

## Additional Information

 **Product Leaflet**

 **Technical and Installation Guide**

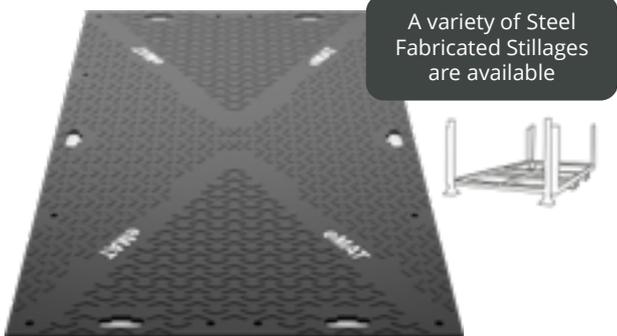

**We advise not to use Steel Tracked vehicles with any composite mats unless pre-authorized and agreed beforehand, traversing and aggressive movement on the mats may cause damage to them and the connectors and this will be the sole responsibility of the customer and user of the mats.**

# E-MAT HEAVY DUTY ACCESS MATS

Providing effective Temporary Access and Ground Protection for heavy plant and machinery. It's highly engineered 'non-slip' traction surface substantially reduces slippage even in the most challenging weather or ground conditions.

E-Mat Heavy Duty Access Mats can be connected with a variety of different connection systems to match varying ground and weather conditions and applications, as standard it also has a vehicular traction surface on top with a pedestrian non-slip traction surface on the underside.

-  **80 tonnes**
-  **35/18Kg**
- 
- 

## Specifications

|                  |  |
|------------------|--|
| <b>Size:</b>     | 2.4m [L] x 1.2m [W] x 12mm [D]<br>Half size: 2.4m [L] x 0.6m [W] x 12mm [D]                        |
| <b>Weight:</b>   | 35Kg / 18Kg  |
| <b>Load:</b>     | Suggested 80 tonnes, weight tested up to 120 tonnes (depending on ground conditions)               |
| <b>Material:</b> | 100% Recycled High Density Polyethylene (HDPE) and 100% recyclable                                 |
| <b>Surface:</b>  | Top: High profile vehicular traction surface for optimal grip. Bottom: Non-slip pedestrian surface |

## Key Features

- ✓ High profile vehicular traction surface for optimal grip in all weather conditions
- ✓ Low profile non-slip traction surface for pedestrian walk ways
- ✓ Multiple connection points
- ✓ 6 hand holes for easy handling and installation
- ✓ Avoids environmental damage
- ✓ Reduces vehicle bogging
- ✓ Low cost transportation and handling
- ✓ Various connection options

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term
- Used/second hand
- Buyback
- Lease or Finance

## Additional Information

-  **Technical and Installation Guide**

**We advise not to use Steel Tracked vehicles with any composite mats unless pre-authorized and agreed beforehand, traversing and aggressive movement on the mats may cause damage to them and the connectors and this will be the sole responsibility of the customer and user of the mats.**

# EUROTRAK HD HEAVY DUTY ACCESS MATS

Designed as a short and long term access solution, whilst providing effective Ground Protection and reducing damages on site.

Our EuroTrak HD Access Mats have a highly engineered, non-slip traction surface, which helps reduce slippage even in the most challenging weather and ground conditions.

-  **max 60 tonnes**
-  **44/22Kg**
- 
- 

A variety of Steel Fabricated Stillages are available

## Specifications

|                  |  |
|------------------|--|
| <b>Size:</b>     | 2.4m [L] x 1.2m [W] x 15mm [D]<br>Half size: 2.4m [L] x 0.6m [W] x 15mm [D]  |
| <b>Weight:</b>   | 44Kg / 22Kg  |
| <b>Load:</b>     | Suggested 60 tonnes, weight tested up to 120 tonnes (depending on ground conditions and when used with a sub-base) |
| <b>Material:</b> | 100% Recycled High Density Polyethylene (HDPE) and 100% recyclable   |
| <b>Colour:</b>   | Black  |

## Key Features

- ✓ Vehicular/Pedestrian traction surface
- ✓ Quick and easy installation
- ✓ 6 strategically positioned hand/connection holes
- ✓ Low transportation and handling costs
- ✓ Avoids health and safety issues
- ✓ Avoids property, heritage and environmental damage
- ✓ Avoids bogged down vehicles, saving valuable time and money

## Budget Options

**We advise not to use Steel Tracked vehicles with any composite mats unless pre-authorized and agreed beforehand, traversing and aggressive movement on the mats may cause damage to them and the connectors and this will be the sole responsibility of the customer and user of the mats.**

# HARDWOOD TIMBER BOG MATS

European Hardwood Bog Mats are grown and manufactured to be hard wearing and effective when used as a Temporary Roadway and Access solution.

All bog mats are sourced from contracted sawmills in Europe which respect National Forest Management Plans, to be environmentally reusable and cause minimum ground disturbance and environmental impact.

**max 50+ tonnes**

**230-1600Kg**

**Weather proof**

## Specifications

|             |  |
|-------------|--|
| Size:       | 3-6m [L] x 1m [W] x 70-300mm [D]   |
| Weight:     | 230Kg - 1600Kg   |
| Load:       | Suggested 50-200 tonnes, weight tested up to 250 tonnes (depending on ground conditions) |
| Material:   | 100% Hardwood Timber   |
| Regulatory: | National Forest Management Plans via contracted sawmills                                 |

## Key Features

- ✓ Quick and easy install with lifting points
- ✓ No need to connect together
- ✓ Sustainably sourced hardwood
- ✓ Can be used with steel tracked vehicles
- ✓ Easy to stock and transport
- ✓ Ability to support extremely heavy loads, plant and machinery
- ✓ Ultimate solution for access when dealing with extremely soft and boggy ground conditions

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term
- Buyback
- Lease or Finance

## Additional Information

## Long lasting

- Temporary bridges / crane outrigger mats
- Marine and lake projects / piling / jetties
- River or road embankments & stabilisation
- Towpaths & crossings
- Supporting structures

# K-MAT HEAVY DUTY ROADWAY PANELS

A temporary and portable Heavy Duty Roadway Panel, designed to provide Temporary Access and Ground Protection for extremely heavy plant and machinery, used in a wide variety of applications and key industries.

**max 100 tonnes**

**295Kg**

With safety in mind, our K-Mat Heavy Duty Roadway Panels incorporate a dual grip design, featuring a high profile traction surface for vehicles on one side, and a unique non-slip traction surface for increased grip for pedestrians and contractors.

A variety of Steel Fabricated Stillages are available

## Specifications

|           |   |
|-----------|---|
| Size:     | 3m [L] x 2.5m [W] x 40mm [D]  |
| Weight:   | 295Kg   |
| Load:     | Suggested 100 tonnes, weight tested up to 160 tonnes (depending on ground conditions) |
| Material: | 100% Recycled Ultra High Molecular Weight Polyethylene (UHMWPE) and 100% recyclable   |
| Colour:   | Black as standard. Other colours available (subject to minimum order quantities)      |

## Key Features

- ✓ High profile traction surface for vehicles, underside low profile non-slip surface for pedestrians.
- ✓ Fast, effective and simple connection system
- ✓ Ability to support extremely heavy loads in a wide variety of weather conditions
- ✓ Avoids health and safety issues and is non-conductive
- ✓ Avoids property, heritage and environmental damage
- ✓ Avoids vehicles from becoming bogged down, saving valuable time and money
- ✓ Various connection options

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term
- Buyback
- Lease or Finance

## Additional Information

[Product Leaflet](#)

[Technical and Installation Guide](#)

**We advise not to use Steel Tracked vehicles with any composite mats unless pre-authorized and agreed beforehand, traversing and aggressive movement on the mats may cause damage to them and the connectors and this will be the sole responsibility of the customer and user of the mats.**

# PORTAPATH™

**An innovative turf and surface protection system which is an excellent all-weather, all-year round alternative to traditional protective flooring systems.**

Perfect for any event, whatever the size, PortaPath will prevent soil compaction and with its unique anti-slip surface, this product is ideal for pedestrians and wheelchair users for any event.

A durable, lightweight, attractive and affordable solution with a unique and integral 'living hinge' design which gives the system strength when locked together.

-  **2 tonnes**
-  **3.7Kg/m<sup>2</sup>**
- 

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | Tile: 31.11cm [L] x 8.51cm [W] x 1.59cm [D]<br>Supplied in 1m <sup>2</sup> sections |
| <b>Weight:</b>   | 3.7Kg per m <sup>2</sup>  |
| <b>Load:</b>     | Weight tested to 2 tonnes (depending on ground conditions)                          |
| <b>Material:</b> | High impact UV protected polypropylene, 100% recycled plastic                       |
| <b>Colour:</b>   | Grey, blue or green. Other colours available (subject to minimum order quantities)  |

## Key Features

- ✓ Provides safe and effective access for pedestrians and wheelchair users
- ✓ Lightweight and anti-slip
- ✓ Can be laid in any format
- ✓ High heel friendly, wheelchair access
- ✓ Ventilation slots to allow light and air through the grass beneath reducing grass discolouration and damage
- ✓ Easy to clean, maintain and fast to install and dismantle
- ✓ Can be laid on grass or solid surface

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Hire for short or long term**
- **Used/second hand**
- **Buyback**

-  **Technical and Installation Guide**

**We advise not to use vehicles with PortaPath unless pre-authorized and agreed beforehand. Traversing and aggressive movement on the mats may cause damage to them and the connectors, and this will be the sole responsibility of the customer and user of the mats.**

# SAFE SITE MATTING

A fast and effective solution that can be used to provide both short and long term access and Ground Protection.

Safe Site Matting can be easily adapted to fit around obstacles and has a simple but effective tongue and groove connection system, which also acts as an effective drainage solution. Impact noise can also be significantly reduced.

A variety of Steel Fabricated Stillages are available

## Specifications

|           |   |
|-----------|---|
| Size:     | 1.2m [L] x 0.8m [W] x 22mm [D]  |
| Weight:   | 20Kg  |
| Load:     | Suggested 10 tonnes, weight tested up to 20 tonnes (depending on ground conditions) |
| Material: | 100% Recycled High Grade rubber material  |
| Colour:   | Black as standard. Other colours available (subject to minimum order quantities)    |

## Key Features

- ✓ Low profile traction surface for pedestrian walkways, outdoor events and overflow car parks
- ✓ Unique non-slip surface for grip in all weather conditions
- ✓ Easy to clean and store
- ✓ Resistance to oil, chemicals and toxins
- ✓ Fast, simple and effective installation and connection
- ✓ Avoids health and safety issues
- ✓ Low transportation and handling costs

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

**Elite GSS Ltd highly recommend using ramps with the Safe Walk.**

**We advise not to use Steel Tracked vehicles with any composite mats unless pre-authorized and agreed beforehand, traversing and aggressive movement on the mats may cause damage to them and the connectors and this will be the sole responsibility of the customer and user of the mats.**

# STEEL ROAD PLATES

Provide safe cover for open trenches and excavations, to be used as both a short and long-term solution within groundworks or utility projects.

Steel Road Plates are manufactured from mild steel and supplied in a range of steel gauges in order to best suit your needs and application, also provided either plain, non-slip or anti-skid.

## Specifications

|                  |   |
|------------------|---|
| <b>Sizes:</b>    | 2.4m [L] x 1.2m [W] x 19mm [H]<br>Other sizes are available                           |
| <b>Weight:</b>   | 420Kg   |
| <b>Load:</b>     | Suggested 100 tonnes, weight tested up to 120 tonnes (depending on ground conditions) |
| <b>Material:</b> | Mild Steel manufactured in UK, either finished plain, non-slip or anti-skid           |

## Key Features

- ✓ Anti-skid, non-slip and plain surface
- ✓ Pedestrian or vehicular use
- ✓ Effective trench and deep excavation protection
- ✓ 60mm lifting holes in each corner
- ✓ Range of steel gauges
- ✓ Manufactured in UK

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term
- Used/second hand

## Meeting all the standards

All of the Elite anti-skid road plates we manufacture, supply, repair or recondition are tested and verified to meet all BBA standards.

# ELITE SITEPATH

**A hi-visibility and industrial walkway solution perfect for use within factories and screeded construction site floors.**

The Elite SitePath is a lightweight and hi-visibility matting solution which has been designed with reduced trip potential in mind through it's low profile and diamond pattern top surface.

It is made from a flexible material that can be laid onto uneven surfaces which makes it even ideal for external walkways and unprepared floors.

-  **14/28Kg**
-  **Diamond Pattern**
-  **Low Trip Potential**
-  **High Visibility**

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | Small: 1.0m [W] x 5m [L] x 2mm [H]<br>Large: 1.0m [W] x 10m [L] x 2mm [H]<br>Supplied in long rolls |
| <b>Weight:</b>   | 14Kg / 28Kg   |
| <b>Material:</b> | Polyvinyl Chloride (PVC)  |
| <b>Colour:</b>   | Hi-visibility yellow  |

## Key Features

- ✓ Hi-visibility walkway
- ✓ Lightweight matting
- ✓ Flexible material which can be laid onto uneven surfaces
- ✓ Diamond pattern top surface
- ✓ Easily cleaned with a jet washer or hose
- ✓ Easy and fast installation
- ✓ Low profile reduces trip potential

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Lease or Finance**

## Additional Information

-  **Product Leaflet**
-  **Technical and Installation Guide**

## REACH Compliant

This product is REACH compliant (Registration, Authorisation and Restriction of Chemicals), in which we aim to help improve the protection of human health and the environment from chemical hazards.

## **TRAFFIC MANAGEMENT BARRIERS & FENCING**

Our range includes short and long-term solutions to provide complete separation between pedestrians and free-flowing traffic, with products like Acoustic, Crowd Control or Chapter 8 Barriers and water filled heavy duty barriers.

## Acoustic Barrier

The Acoustic Barrier is an effective temporary sound barrier solution designed to help protect local communities and employees from the harmful effects of excessive noise on site.

Railway Maintenance    Construction Sites    Utility Projects    Pedestrian Walkways

## Anti-climb Mesh Fence Panel

The Anti-climb Mesh Fence Panel is a safe and cost effective way to temporarily fence off a site, directing the public away from unsafe and hazardous areas.

Construction Sites    Festivals and Outdoor Events    Pedestrian Walkways    Civil Engineering /Infrastructure

## Buddha Barrier

The Buddha Barrier is a uniquely designed, completely anti-trip 'water filled' solution that creates a safer environment for both pedestrians and vehicles.

Construction Sites    Roadworks/Traffic Management    Civil Engineering /Infrastructure    Airports/Terminals

## Bison Barrier

The Bison Barrier is a heavy duty water filled separator that rotates a full 90° to box off projects for added versatility and security.

Construction Sites    Sports Grounds or Renovation    Civil Engineering /Infrastructure    Festivals and Outdoor Events

## Chapter 8 Barrier

The Chapter 8 Barrier is manufactured to provide incredible strength and durability and are an essential piece of building or site equipment for any project.

Utility Projects    Roadworks/Traffic Management    Construction Sites    Civil Engineering /Infrastructure

## Fixed Leg Crowd Control Barrier

The Fixed Leg Crowd Control Barrier is a necessary piece of building equipment that is used to demarcate specific areas on your site or event.

Roadworks/Traffic Management    Construction Sites    Utility Projects    Festivals and Outdoor Events

## Elite SlotBlock Barrier

Our Elite SlotBlock Barrier is a unique water filled system to provide increased site safety and visually highlight fence lines on site whilst providing extra stability.

Civil Engineering /Infrastructure    Construction Sites    Pedestrian Restricted Areas    Festivals and Outdoor Events

## Extendable Diamond Barrier

A unique and innovative expandable barrier, the Extendable Diamond Barrier is used to keep the public out of restricted or hazardous areas, an ideal temporary demarcation solution in and around sites.

Railway Maintenance    Construction Sites    Warehouse    Leisure and Outdoor Events

## Extendable Diamond Barrier HD

The Extendable Diamond Barrier HD is a heavy duty extendable aluminium barrier used to safely keep the public out of restricted or hazardous areas in and around sites.

Railway Maintenance    Construction Sites    Warehouse    Leisure and Outdoor Events

## MASS Barrier

The MASS (Multi Applicational Safety System) Barrier is a heavy-duty traffic/pedestrian segregation barrier helping to protect the workforce, pedestrians and vehicle occupants.

Roadworks/Traffic Management    Construction Sites    Airports/Terminals    Roadways and Motorways

## Pyramid Barrier

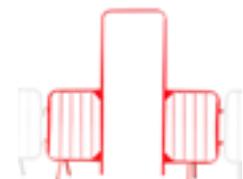

The Pyramid Barrier is a unique 'water filled' barrier solution providing demarcation and added site safety for both pedestrians and vehicles.

Construction Sites    Roadworks/Traffic Management    Utility Projects    Civil Engineering /Infrastructure

## Walkthrough Barrier

The Walkthrough Barrier is a simple and cost effective solution for clearly marking access points to allow for safe, intelligent, pedestrian control.

Building Sites    Construction Sites    Pedestrian Access    Festivals and Outdoor Events

## WonderWall™ Barrier

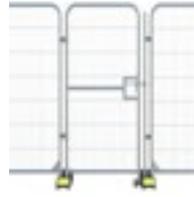

The WonderWall Barrier is a robust barrier that provides maximum stability in high winds without the need for extra ballast, creating a safer work environment.

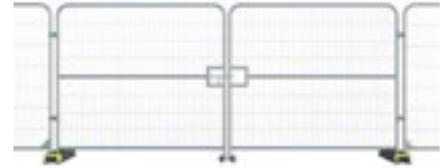

## Mesh Pedestrian Gate

The Mesh Pedestrian Gate is a cost-effective and short-term temporary fencing solution to control site access and increase security on site.

## Mesh Vehicle Gate

The Mesh Vehicle Gate is a lightweight and cost-effective temporary solution which increases site security and improves access control.

## Hoarding Panel

A portable and temporary Hoarding Panel solution used to form a private and safe perimeter fence during demolition and construction works.

## Hoarding Vehicle Gate

The Hoarding Vehicle Gate is a robust and portable to regulate the traffic flow in and out of a construction site.

## Extendable Cone Bar

Restrict access using a simple twist lock Extendable Cone Bar that securely loops onto traffic cones to make a temporary barrier between cones.

## Post and Chain Barrier

The Post and Chain Barrier is a cost-effective solution used to cordon off areas for pedestrian and vehicle safety.

# ACOUSTIC BARRIER

An effective temporary sound barrier solution designed to help protect local communities and employees from the harmful effects of excessive noise on site.

An easy and cost effective system for noise attenuation, delivering outstanding results.

The Acoustic Barriers are water, fire and temperature resistant.

-  **Waterproof**
-  **Noise Reduction**
-  **5.3/13Kg**

## Key Features

- ✓ Protects the workforce and public from harmful and excessive noise
- ✓ Easy hook and eyelet connection
- ✓ Multi-award winning and endorsed by Crossrail and Transport for London
- ✓ Easy to handle, store and transport
- ✓ Water, fire, temperature and UV resistant
- ✓ 43dB max noise reduction
- ✓ Reduced carbon footprint
- ✓ Reflective strips for extra visibility at night

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Hire for short or long term**
- **Used/second hand**
- **Buyback**
- **Lease or Finance**

## Additional Information

-  **Product Leaflet**
-  **Technical and Installation Guide**

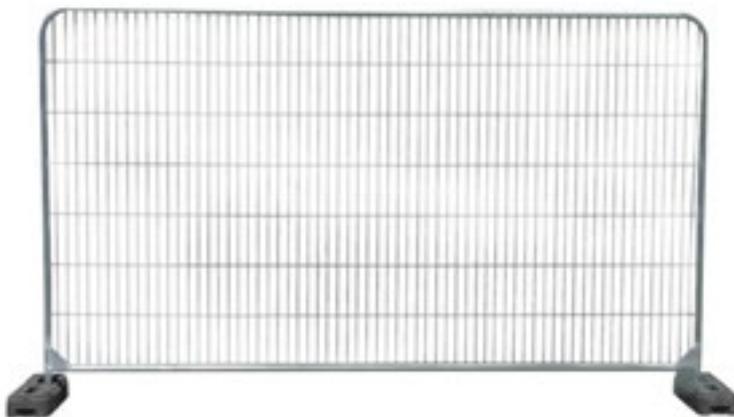

**In order to optimise sound reduction, the barriers should be placed strategically. The closer the barrier is to the noise source, the larger the acoustic shadow and then greater the sound attenuation.**

# ANTI-CLIMB MESH FENCE PANEL

The safe and cost effective way to temporarily fence off a site, directing the public away from unsafe and hazardous areas.

|   |  |   |
|---|--|---|
|  17Kg |  Protect people |  BS EN 10204:2 |
|---|--|---|

This round-top Anti-Climb Mesh Fence Panel has been specifically designed to allow fast and effective methods of temporarily securing an area.

## Specifications

|           |  |
|-----------|--|
| Size:     | 2.0m [L] x 3.5m [W] x 2.1mm [D]            |
| Weight:   | 17Kg                                       |
| Material: | Galvanised Steel to BS EN 10204-2 Standard |
| Colour:   | Galvanised                                 |

## Key Features

- ✓ Provides an effective security perimeter
- ✓ Easy and quick installation and assembly
- ✓ To be used in conjunction with rubber block feet and standard fence couplers
- ✓ Anti-climb frame
- ✓ Efficient stacking for storage and distribution
- ✓ Can be stored and transported in stillages
- ✓ Advertising banners and hi-visibility
- ✓ Standard or hi-visibility rubber block fence feet and anti-tamper or standard fence couplers can be used in conjunction with this product\*

# BUDDHA BARRIER

The uniquely designed, completely anti-trip 'water filled' solution that creates a safer environment for both pedestrians and vehicles.

|  |  |   |   |
|--|--|---|---|
|  <b>Easy to join</b> |  <b>5.5Kg</b> |  <b>27.5Kg</b> |  <b>270°</b> |
|--|--|---|---|

The Buddha Barrier is designed with stability to connect and swivel into position, using the s-clip, and filled with water enabling contractors to box off projects. Stacking and a mesh fence top can also be added if required, for extra safety of workers on site.

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 1040mm [W] x 800mm [H] x 280mm [D]  |
| <b>Weight:</b>   | 5.5Kg when empty / 27.5Kg when water filled   |
| <b>Assemble:</b> | Double top can be fitted to increase the height to 1800mm. Barriers can be closed face-to-face and swivelled over 270° to create a corner |
| <b>Material:</b> | High Density Polyethylene (HDPE), which is recyclable   |
| <b>Colour:</b>   | Red/white as standard. Can be customised if required  |

## Key Features

- ✓ Use either way around with dual reflective strips
- ✓ Completely anti-trip system
- ✓ Forklift truck entry points
- ✓ Automatic overflow indication that prevents overfilling
- ✓ Double top can be fitted to increase the height to 1800mm
- ✓ Can be faced together over exposed areas
- ✓ Colours can be customised if required

## Budget Options

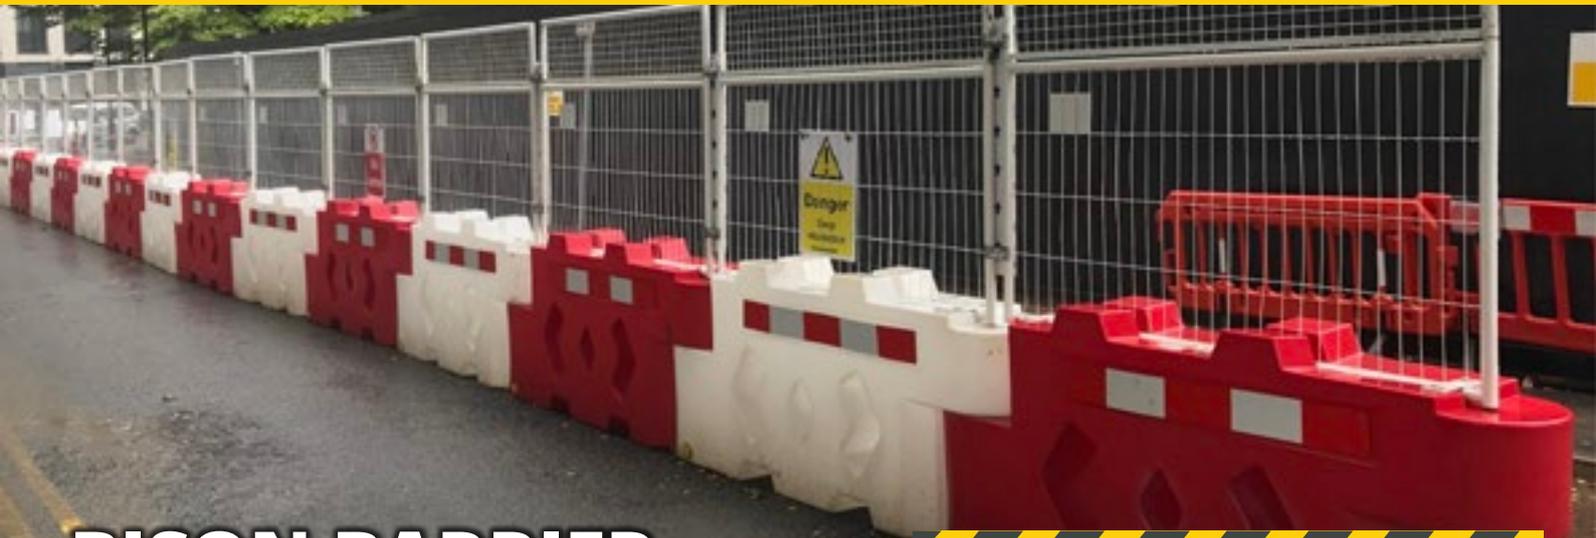

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term
- Used/second hand
- Buyback
- Lease or Finance

## Additional Information

-  **Product Leaflet**
-  **Technical and Installation Guide**

Hi-visibility strips meet reflectivity standard of BSEN12899-1 and the barrier provides a complete Anti-Trip system.

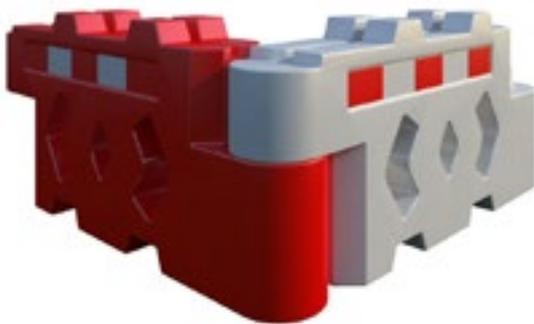

# BISON BARRIER

A heavy duty water filled separator that rotates a full 90° to box off projects for added versatility and security.

Connect together to form a complete barrier between the public and free flowing site traffic.

Bison Barrier is the No.1 choice for cost effectiveness, security and safety for any site, they can also be used with either a mesh or hoarding fence top if required.

-  75 mph
-  35Kg
-  90°
-  Water filled

## Specifications

|           |  |
|-----------|--|
| Size:     | 2.0m [L] x 1.0m [W] x 400mm [D]  |
| Weight:   | 35Kg when empty / 400Kg when water filled  |
| Capacity: | 400L to fill. Easy emptying with drainage point and water fill point                 |
| Material: | High Density Polyethylene (HDPE) and 100% recyclable                                 |
| Colour:   | Red/white as standard. Other colours available (subject to minimum order quantities) |

## Key Features

- ✓ A strong and durable site security solution
- ✓ Anti-slide feature when stacked
- ✓ Rotates to 90° angles
- ✓ Tested to withstand 75 mph wind speeds
- ✓ Can be used with a mesh or hoarding panel
- ✓ Chapter 8 compliant hi-visibility strips
- ✓ Easy to install and move around site via forklift

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term
- Used/second hand
- Buyback

## Protects against the elements

MIRA Tested to withstand 75 mph wind speeds (excl. fencing or hoarding panels).

# CHAPTER 8 BARRIER

Our Chapter 8 Barrier is manufactured to provide incredible strength and durability and come with free standing 360° swivel feet.

This barrier is an essential piece of building or site equipment for any project.

The Chapter 8 Barrier is quick and easy to assemble, even on unequal ground with barrier-to-barrier connection and is ideal for both indoor and outdoor use.

-  9/10Kg
-  360°
-  Reflective

## Specifications

|                    |   |
|--------------------|---|
| <b>Size:</b>       | 2.0m [L] x 1.0m [W] x 50mm [D]<br>660mm [D] with standard feet<br>480mm [D] with anti-trip feet             |
| <b>Weight:</b>     | 9Kg / 10Kg  |
| <b>Regulatory:</b> | Conforms to Traffic Sign Regulations and General Directions with BSEN8442 and Reflectivity with BSEN12899-1 |
| <b>Material:</b>   | 100% High Density Polyethylene (HDPE)   |
| <b>Colour:</b>     | Hi-visibility orange base. Black swivel feet. Other colours available (subject to minimum order quantity)   |

## Key Features

- ✓ Rotates to 360° angles
- ✓ Compact footprint – ideal for storage
- ✓ Easy lift with quick hook & eye assembly
- ✓ Anti-trip feet optional
- ✓ High visibility for protecting work areas
- ✓ Can be connected on uneven ground
- ✓ Chapter 8 reflectivity BSEN12899-1
- ✓ Stackable to 40 barriers per pallet
- ✓ Single man lift and installation

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term
- Used/second hand
- Buyback
- Lease or Finance

## Additional Information

-  **Product Leaflet**
-  **Technical and Installation Guide**

Each barrier can be swivelled or positioned at different ground heights to follow the contours and boundaries to mark out the area.

The feet are easily interchangeable from standard to anti-trip.

# FIXED LEG CROWD CONTROL BARRIER

The Fixed Leg Crowd Control Barrier is a necessary piece of building equipment that is used to demarcate specific areas on your site or event.

11Kg

Protect people

Commonly used to help control the flow of pedestrian traffic and confine the public from areas which may be unsafe or restricted. Our Fixed Leg Crowd Control Barrier is a cost effective and hardwearing solution.

## Specifications

|           |  |
|-----------|--|
| Size:     | 2.3m [L] x 1.1m [W] x 38.1mm [D]   |
| Weight:   | 11Kg   |
| Material: | Galvanised Steel   |
| Colour:   | Galvanised or powder coated red/white as standard. Other colours available (subject to minimum order quantity) |

## Key Features

- ✓ Provides effective crowd protection
- ✓ Can be used both indoors and outdoors
- ✓ Easy and quick installation and assembly
- ✓ Fixed legs
- ✓ Versatile and stackable
- ✓ Simple hook and eye connection
- ✓ Available in a variety of colours and powder coated
- ✓ Can be customised with company name and details

**We advise to use the Extendable Diamond Barrier on a clean, smooth and even surface for optimum performance.**

# EXTENDABLE DIAMOND BARRIER HD

A heavy duty extendable aluminium barrier used to safely keep the public out of restricted or hazardous areas.

The Extendable Diamond Barrier HD is robust and has been built to last with it's lightweight but strong powder coated aluminium frame.

The system uses high visible red and white which indicates no entry areas and warning in line with highway signage.

 **Durable**

 **Expandable**

 **High Visibility**

## Specifications

**Size:** Two sizes available:  
 440mm [L] x 1380mm [H] x 540mm [D]  
 450mm [L] x 1884mm [H] x 542mm [D]  
 Maximum extendable lengths:  
 2185mm [L] x 1380mm [H] x 540mm [D]  
 2380mm [L] x 1884mm [H] x 542mm [D]  
 Barriers can be connected together

**Weight:** 30Kg / 40Kg

**Material:** Industrial Aluminium, Stainless Steel, Plastic  
 Thickness: 1.5mm with rubber castors

**Colour:** Pillar Box red (RAL 3020) and  
 Signal white (RAL 9003)

## Key Features

- ✓ Heavy Duty, yet lightweight
- ✓ Maximised safety features
- ✓ Safety locks/brakes on the wheels to keep barrier stationary\*
- ✓ Unique latch locking mechanism
- ✓ Easy to move and expand
- ✓ Can be used both in and outdoors
- ✓ Deploys in seconds to separate restricted areas
- ✓ Rubber castors as standard to restrict surface damage

# MASS BARRIER

A heavy-duty traffic/pedestrian segregation barrier that self-stabilises when an errant vehicle hits the system, helping to protect the workforce, pedestrians and vehicle occupants.

|   |   |  |
|---|---|--|
|  <b>Durable</b> |  <b>60Kg</b> |  <b>High Visibility</b> |
|---|---|--|

A high quality, attractive and reliable vehicle restraint system that stands out amongst it's competitors.

Highly versatile due to the selection of fencing panels that work together with the base of the unit to provide options for specific uses.

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 1500mm [L] x 500mm [W] x 420mm [H]  |
| <b>Weight:</b>   | 60Kg per section  |
| <b>Testing:</b>  | Crash tested speed up to 80kmh and 9.68Kn wind force from >10m distance<br>Wind loading calculations when using fence panels available upon request |
| <b>Material:</b> | Hot Dip Galvanised Steel and a protective powder coated finish. All metal parts are Zinc galvanised to maximise working life of the system          |
| <b>Colour:</b>   | Red/white   |

## Key Features

- ✓ Improves public and workforce safety
- ✓ Anchorage at the terminal sections, no need for the base to be fixed to road
- ✓ Bases linked together with vertical pins
- ✓ Accommodates 90° bends
- ✓ Wind resistant
- ✓ High visibility, easily and rapidly deployed
- ✓ Fully tested to T2 W5 and for vehicle containment under BS EN1317-2:1998
- ✓ Provides a foundation for the four additional guard elements
- ✓ Straightforward storage and transport

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Hire for short or long term**
- **Buyback**
- **Lease or Finance**

## Additional Information

-  **Accessories Guide**
-  **Product Leaflet**
-  **Technical and Installation Guide**

**A risk assessment should be taken prior to use and for wind loading when using top sections. When installing the base units, we recommend they're installed on a flat and even surface. This aids the installation of the top sections later.**

# PYRAMID BARRIER

A unique 'water filled' barrier solution providing demarcation and added site safety for both pedestrians and vehicles.

|   |  |   |  |
|---|--|---|--|
|  <b>Easy lock</b> |  <b>5Kg</b> |  <b>55Kg</b> |  <b>90°</b> |
|---|--|---|--|

The Pyramid Barrier is simply connected together creating an effective separation between the public and the working site. They are designed to rotate a full 90°, enabling contractors to box off projects and providing added security, a mesh fence top can also be added if required.

## Specifications

|                  |  |
|------------------|--|
| <b>Size:</b>     | 1m [L] x 560mm [H] x 400mm [D]   |
| <b>Weight:</b>   | 5Kg when empty / 55Kg when water filled  |
| <b>Material:</b> | High Density Polyethylene (HDPE) and 100% recyclable                                 |
| <b>Colour:</b>   | Red/white as standard. Other colours available (subject to minimum order quantities) |

## Key Features

- ✓ Box off areas for a safe site
- ✓ High visibility red/white and other colours available
- ✓ Effectively stackable for storage
- ✓ Cost effective road traffic separator
- ✓ Rotate a full 90° reducing the number of units required
- ✓ Filled weight of 55Kg - more than alternative options
- ✓ Can be provided with 1m steel mesh extension

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Hire for short or long term**
- **Used/second hand**
- **Buyback**
- **Lease or Finance**

## Additional Information

-  **Product Leaflet**
-  **Technical and Installation Guide**

The unique way it's been designed allows straight or rotation to a full 90°, as well as being able to connect to the majority of existing barriers on the market.

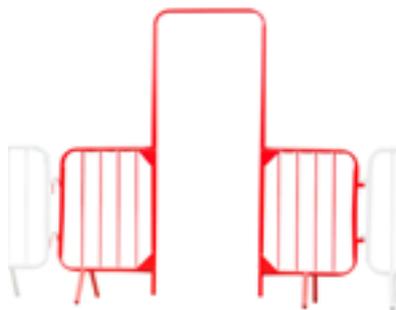

# WALKTHROUGH BARRIER

A simple and cost effective solution for clearly marking access points to allow for safe, intelligent, pedestrian control.

The Walkthrough Barrier helps to address safety issues surrounding crowd and pedestrian control by providing entry/exit points.

The powder coating helps to improve the visibility of the barrier, which clearly highlights the crossing point, they can also be supplied with spring loaded gate.

-  **22Kg**
-  **Crossing Points**
-  **High Visibility**

## Specifications

|                                  |   |
|----------------------------------|---|
| <b>Size:</b>                     | 2.0m [H] x 2.3m [W] with 990mm gap for pedestrian crossing point  |
| <b>Weight:</b>                   | 22Kg  |
| <b>Tubular Frame and Infills</b> | Frame: 38.1mm diameter/ 1.2mm gauge circular hollow section<br>Infills: 12.7mm diameter circular hollow section |
| <b>Material:</b>                 | Galvanised Steel  |
| <b>Colour:</b>                   | Powder coated red as standard.<br>Other colours can be powder coated (subject to minimum order quantity)        |

## Key Features

- ✓ Versatility of a strong crowd control system, whilst having specific safe access points
- ✓ Reduced number of joins from it's round top which eliminates weak spots
- ✓ Four supporting corner plates
- ✓ Long life span
- ✓ Optional spring-loaded gate available
- ✓ Hook and eye connection
- ✓ Split offset leg system adds stability and makes the barriers easy to stack
- ✓ Top tube punched, 15 infill bars spaced at 130mm intervals slotted in and welded to the bottom of the frame

# HOARDING PANEL

A portable and temporary Hoarding Panel solution used to form a private and safe perimeter fence during demolition and construction works.

The steel Hoarding Panel is easy to install and make a solid fencing perimeter to increase your site security and privacy.

The panel is made of corrugated sheets with vertical tubes for the frame that run down either side. The tubes fit into standard or hi-visibility rubber block fence feet in order to support each panel.

-  30/40Kg
-  Durable
-  Secure

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 2.0m panel frame [H] x 2.1m [W] x 0.75mm [D]<br>2.4m panel frame [H] x 2.1m [W] x 0.75mm [D]  |
| <b>Weight:</b>   | 30Kg / 40Kg   |
| <b>Material:</b> | Pre-galvanised Steel / painted one side / powder coated one side  |
| <b>Colour:</b>   | Galvanised. Can be painted and powder coated specific to RAL colour requirements (subject to minimum order quantity and an additional cost) |

## Key Features

- ✓ Easy to install and slot into standard or hi-visibility rubber block fence feet\*
- ✓ Increased strength from their corrugated galvanised steel sheets
- ✓ Deterrent against vandalism
- ✓ Can be used with infills\*
- ✓ Channel along top and bottom is bird mouthed to snugly fit flush around the tube and hold the steel sheets into place

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term
- Used/second hand
- Buyback
- Lease or Finance

# HOARDING VEHICLE GATE

A robust portable Hoarding Vehicle Gate to regulate the traffic flow in and out of a construction site.

|  |   |  |  |
|--|---|--|--|
|  65/85Kg |  Durable |  Regulate traffic |  Secure |
|--|---|--|--|

The temporary steel Hoarding Vehicle Gate is made of two galvanised sheets that are fitted with stabilising wheels for easy opening and closing.

It can be connected to the existing solid fencing perimeter of Hoarding Panels and secured together using chains and a padlock.

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 2.0m panel frame [H] x 4.1m [W] x 0.75mm [D]<br>2.4m panel frame [H] x 4.1m [W] x 0.75mm [D]<br>Tube thickness: 38mm                        |
| <b>Weight:</b>   | 65Kg / 85Kg   |
| <b>Material:</b> | Profiled Galvanised Steel   |
| <b>Colour:</b>   | Galvanised. Can be painted and powder coated specific to RAL colour requirements (subject to minimum order quantity and an additional cost) |

## Key Features

- ✓ Effective way of regulating site traffic
- ✓ Robust and portable
- ✓ Supported using standard or anti-tamper fence couplers\*
- ✓ Easy to slot into standard or hi-visibility rubber block fence feet
- ✓ Stabilising wheels for instant access

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

# EXTENDABLE CONE BAR

Restrict access using a simple twist lock Extendable Cone Bar that securely loops onto traffic cones to make a temporary barrier between cones.

-  **Quick extend**
-  **Light lift**
-  **High visibility**
-  **Fast setup**

The Extendable Cone Bar is manufactured to be lightweight, with high visibility tape and a securing hoop at each end that can be used with almost any traffic cone on the market.

A variety of Traffic Cones are available on request

## Specifications

|                    |   |
|--------------------|---|
| <b>Size:</b>       | 1300mm/1800mm [L] when closed<br>2220mm/2280mm [L] when extended<br>Securing Hoops: 80mm diameter |
| <b>Weight:</b>     | 0.5Kg   |
| <b>Material:</b>   | 100% Recycled High Density Polyethylene (HDPE)  |
| <b>Colour:</b>     | Red/white as standard. Black/yellow available   |
| <b>Durability:</b> | Shatter resistant, withstands pressure and is not affected by weather conditions                  |

## Key Features

- ✓ Very easy to use and extend to size
- ✓ 80mm diameter hoop to fit almost any traffic cone
- ✓ Simple twist and lock extension
- ✓ Highly visible demarcation
- ✓ Long lasting and not affected by weather
- ✓ Compact for easy storage
- ✓ All types of traffic cone available too
- ✓ Easy to store and transport

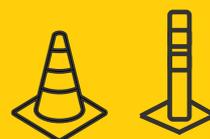

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

-  **Technical and Installation Guide**

We have a variety of One Piece and Two Piece Road Safety Cones for specific applications and environments – contact us with your enquiry.

# POST AND CHAIN BARRIER

A cost-effective and simple barrier solution used to help cordon off areas for pedestrian and vehicle safety.

Our Post and Chain Barrier can be used both internally or externally and this system is ideal at creating restricted access areas and managing crowd flow.

The Post and Chain Barrier can be used within a wide range of industries sectors for both short and long term projects.

£ Cost Effective

Water filled base

1Kg

High Visibility

## Key Features

- ✓ Includes heavy duty water-filled base
- ✓ A removeable plug for easy drainage
- ✓ Red/white alternating colours make the posts highly visible
- ✓ 4 integrated chain eyes on the head cap
- ✓ Can be used both indoors and outdoors
- ✓ Quick and easily deployed
- ✓ Chains are available and sold separately
- ✓ Lightweight and easy to install and transport

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

## Saving Time and Frustration

Our Post and Chain Barrier is simple and easy to install, saving time and frustration.

# GROUND STABILISATION & REINFORCEMENT

Our range of mesh and grid style solutions provide permanent reinforcement of soft ground, driveways, earth banks and vehicle parking areas.

## EcoGrid Porous Pavers

A permeable paving, ground support and stabilisation solution ideal for the reinforcement of footpaths, car parks, shed foundations and more.

- Car Parks and Driveways
- Military Sites
- Gardens and Landscaping
- Agriculture and Paddocks

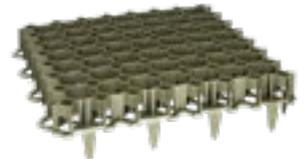

## Elite GP-Flex®

A flexible grass protection mesh system with improved slip resistance for fast stabilisation or reinforcement.

- Temporary Access and Ground Protection
- Marquee/Garden Flooring
- Vehicular Access
- Festivals and Outdoor Events

## Elite Grass Grid

Ideal in the use of permanent reinforcement of soft ground, for parking of vehicles and the stabilisation of soft earth banks.

- Car Parks and Driveways
- Gardens and Landscaping
- Golf Courses
- Access Routes

# ECOGRID POROUS PAVERS

A permeable paving, ground support and stabilisation solution ideal for the reinforcement of footpaths, car parks, shed foundations and more.

|   |   |   |
|---|---|---|
|  <b>250-1000 tonnes/m<sup>2</sup></b> |  <b>Lightweight Grid types</b> |  |
|---|---|---|

A cost effective and environmentally friendly substitute for paving stones, asphalt and concrete.

Once installed, they can be filled and finished with a choice of mixtures, ranging from pea shingle, decorative stone, or if required a soil and grass mix.

Per 15 sqm of grids - approximately 1 tonne of stones needed (depending on infill type)

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 330mm [L] x 330mm [W]<br>Thickness E30: 30mm/ E40: 40mm / E50: 50mm                     |
| <b>Weight:</b>   | E30: 0.5Kg / E40: 0.52Kg / E40: 0.58Kg per grid   |
| <b>Load:</b>     | Maximum tonnage per sqm (filled) E30: 250 tonnes / E40: 500 tonnes / E50: 1000 tonnes   |
| <b>Material:</b> | 100% Recycled Material, which is also 100% recyclable                                   |
| <b>Colour:</b>   | Black, green or terracotta. Other colours available (subject to minimum order quantity) |

## Key Features

- ✓ Substitution for paving stones, asphalt and concrete
- ✓ Effective Sustainable Urban Drainage System (SUDS)
- ✓ For light/medium/heavy duty applications
- ✓ Patented locking and connection system
- ✓ Withstands high amounts of pressure
- ✓ 20 years manufacturers warranty
- ✓ Environmentally friendly
- ✓ Excellent water drainage
- ✓ UV Stabilised and CE Certified
- ✓ Not affected by extreme weather conditions

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Lease or Finance**

## Additional Information

 **Product Leaflet**

 **Technical and Installation Guide**

**We advise for special care to be taken in the initial ground preparation before the grids are installed, this will ensure a perfect finish at the end of the project. A site survey is also recommended. The weight load distribution performance of this product is subject solely to ground conditions, weight and the type of vehicle or plant.**

**Elite GSS Ltd, it's agents or employees are not liable for any damage to existing ground or property though the use of the EcoGrid Porous Pavers.**

# ELITE GP-FLEX®

**A flexible grass protection mesh system with improved slip resistance for fast stabilisation and reinforcement.**

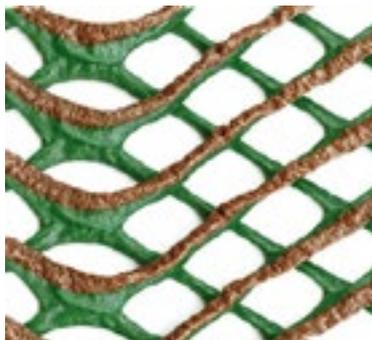

Elite GSS Ltd identified a need to develop this product as a more robust and reliable solution to protect grassed areas. Re-designing and testing showed over 33% improvement to slip resistance and flexibility in comparison to other products.

8 tonnes

Kg/m<sup>2</sup> options

## Specifications

|           |   |
|-----------|---|
| Size:     | 10m [L] x 1m/2m [W] x 9mm/11mm/13mm [D]<br>20m [L] x 1m/2m [W] x 9mm/11mm/13mm [D]  |
| Weight:   | 1Kg / 1.4Kg / 1.8Kg per m <sup>2</sup><br>available in three grades for different purposes<br>– see our product leaflet or visit our website to find out more |
| Load:     | Recommended 8 tonnes (depending on ground conditions)   |
| Material: | 100% Recycled High Density Polyethylene (HDPE)  |
| Colour:   | Green/brown   |

## Key Features

- ✓ Robust and reliable ground solution
- ✓ 3 grades for different purposes
- ✓ Unique method of extrusion
- ✓ BS 7976-2 tested for slip resistance
- ✓ Ideal protection from pedestrian and vehicular damage
- ✓ Sustainable Urban Drainage Systems (SUDS) compliant
- ✓ Redesigned profile made for more flexibility and quicker installation

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

## Additional Information

 [Product Leaflet](#)

 [Technical and Installation Guide](#)

**We recommend that you contact us first with your specific requirements in order for us to advise accordingly. However it should be noted that in all cases the ground should be firm and well drained and the individual ground conditions will determine the suitability for using a grass protection mesh.**

**Elite GSS Ltd, it's agents or employees are not liable for any damage to existing ground or property though the use of the Elite GP-Flex.**

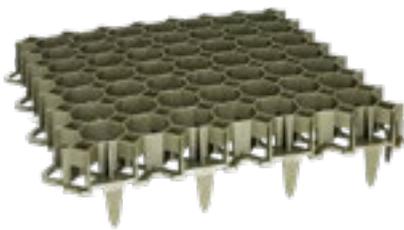

# ELITE GRASS GRID

**Ideal in the use of permanent reinforcement of soft ground, for parking of vehicles and the stabilisation of soft earth banks.**

|   |   |   |   |
|---|---|---|---|
|  <b>Multi-types</b> |  <b>160-500 tonnes/m<sup>2</sup></b> |  <b>0.8-1.5Kg per grid</b> |  |
|---|---|---|---|

A cost effective and environmentally friendly solution for both home owners and contractors.

Once installed, they can be filled and finished with a choice of mixtures, ranging from pea shingle, decorative stone, or if required a soil and grass mix.

Per 15sqm of grids – approx. 1 ton of decorative stone is needed

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 490mm [L] x 490mm [W] x 40mm [D]  |
| <b>Weight:</b>   | Type 1: 0.8Kg / Type 2: 1Kg / Type 3: 1.5Kg per grid  |
| <b>Load:</b>     | Weight tested - Type 1: 160 tonnes / Type 2: 240 tonnes / Type 3: 500 tonnes per m <sup>2</sup> |
| <b>Material:</b> | 100% Recycled Material, which is also 100% recyclable   |
| <b>Colour:</b>   | Green/Grey as standard. Other colours are available (subject to a minimum order quantity)       |

## Key Features

- ✓ Used to increase the stability of soil
- ✓ 3 different options with weight loadings ranging from 160 tonnes/m<sup>2</sup> to 500 tonnes/m<sup>2</sup> filled
- ✓ Unique geometric design
- ✓ Excellent water drainage and ideal when integrated into any Sustainable Urban Drainage System (SUDS)
- ✓ Allows grass growth in all directions
- ✓ Light, Medium & Heavy Duty applications
- ✓ Withstands frost and UV radiation
- ✓ Natural stability temperature 30°C-180°C
- ✓ 8 connection latches, can be secured to the ground with 4 anchoring pins

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Lease or Finance**

## Additional Information

 **Product Leaflet**

# ALUMINIUM STAIRWAY

**A versatile solution to provide access in most work zone environments.**

The Aluminium Stairway is lightweight yet strong and comes with detachable handrails on both sides to provide an extra layer of safety. The Stairway can be easily secured and locked into a preferred angle and the non-slip steps help to provide maximum grip.

-  **Fast Access**
-  **150Kg**
-  **11.9-131.7Kg**
- 

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 3 Step / 6 Step / 9 Step / 12 Steps / 15 Steps / 18 Steps<br>0.82m [L] / 1.76m [L] / 2.53m [L] / 3.38m [L] / 4.24m [L] / 5.08m[L]<br>Outside Width: 890mm, Inside Width: 770mm and Tread Width: 678mm |
| <b>Weight:</b>   | Body only: 11.9Kg / 19.7Kg / 29.8Kg / 39.2Kg / 47Kg / 131.7Kg   |
| <b>Load:</b>     | 150Kg   |
| <b>Material:</b> | Aluminium   |

## Key Features

- ✓ Versatile and allows for fast access
- ✓ Complies with EN 12811
- ✓ An alternative to standard ladders
- ✓ Lightweight, strong aluminium design
- ✓ Steps provide maximum grip
- ✓ The stairway folds flat for easy transport
- ✓ Accommodates a range of pitch angles
- ✓ Includes handrails that slot into position
- ✓ A snap locking scaffold attachment makes it simple to fit onto existing tube and fitting scaffold assemblies

## Variety of Angles

Our Aluminium Stairway can be locked into a range of angles with the slab fixings.

Find out more from our Product Leaflet.

# CABLE RAMP

An effective cable protection solution to allow free and easy movement of both pedestrians and heavy plant and machinery on site.

|                                |                 |  |
|--------------------------------|-----------------|--|
| <b>6/12 tonnes-axle weight</b> | <b>8.5/19Kg</b> |  |
|--------------------------------|-----------------|--|

The Cable Ramp provides added security and safety of wires and cables whilst also allowing the free movement of both pedestrians and heavy machinery and vehicles on site. It has an added hi-visibility yellow lid to ensure safe use in low light conditions.

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 3 Channel: 990mm [L] x 300mm [W] x 45mm [D]<br>5 Channel: 890mm [L] x 590mm [W] x 75mm [D]<br>Each internal channel (for both size options) measures: 50mm [H] x 30mm [W] |
| <b>Weight:</b>   | 8.5Kg / 19Kg  |
| <b>Load:</b>     | 3 Channel: 6 tonnes axle weight<br>5 Channel: 12 tonnes axle weight   |
| <b>Material:</b> | High quality black rubber base with PVC hi-visibility yellow lid  |
| <b>Colour:</b>   | Black/yellow  |

## Key Features

- ✓ Keep cabling safe from vehicles and pedestrians
- ✓ 4 individual securing points – if you need to secure to a hard standing area
- ✓ Simple male/female connection design for quick and effective installation
- ✓ Quick and cost-effective solution
- ✓ Flip lid for easy access to cables
- ✓ Non-slip traction surface
- ✓ Non-conductive

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term

## Events and Festivals

Cable Ramps are particularly ideal for events and festivals in reducing the trip hazard where cabling is prominent. They're also used extensively around construction sites around modular buildings and generators. These Cable Ramps are 100% composite and non-conductive to provide safety of the covered wires.

# ELITE HEIGHT RESTRICTION KIT

A lightweight and easy to transport Height Restriction Kit designed to provide safe and effective over head cable protection.

The Elite Height Restriction Kit, or commonly known as goal posts, are helpful to deploy on site with its quick release and hand controlled clamping system.

It's unique to similar products in the market, with the option of two water filled bases for added stability and withstand up to 60mph winds.

 5Kg

 Expands

 High Visibility

 Water filled

## Specifications

|             |   |
|-------------|---|
| Size:       | 1.72m [L] collapsed pole<br>7.3m [L] extended pole  |
| Weight:     | 5Kg pole with 20Kg Metro block base<br>120Kg when filled with water<br>Standard 25Kg metal bases also available |
| Regulatory: | HSE GS6 compliant   |
| Material:   | Non-Conductive Fibreglass   |
| Colour:     | Hi-visibility red/white   |

## Key Features

- ✓ 2 telescopic/non-conductive poles which extend to over 7 metres
- ✓ 2 water filled bases and includes a set of red and white bunting
- ✓ Tested to MIRA wind rating of 60mph
- ✓ Compliant to Health & Safety guidelines avoiding danger of overhead power lines and low structures
- ✓ Single person assembly to save time

## Protects against the elements

MIRA Tested to withstand 60mph wind speeds.  
*(excl. bases not water filled)*

# PEDESTRIAN TUNNEL

Protect pedestrians from falling debris, tools or materials while contractors work overhead.

The Pedestrian Tunnel units can be connected together, using its precise anchorage system, to create a complete run of protection for the passing public whilst contractors are working on site overhead.

-  **5 Kg**
-  **31Kg**
-  **Stackable**

## Specifications

|                   |   |
|-------------------|---|
| <b>Size:</b>      | 2150mm [W] x 1780mm [H] x 1140mm [D]<br>Height adjustable to 2280mm |
| <b>Weight:</b>    | 31Kg  |
| <b>Drop load:</b> | Tested 5Kg from 25m height  |
| <b>Material:</b>  | Aluminium and highly resistant alveolar polycarbonate cover         |
| <b>Rating:</b>    | Wind resistance up to 120Km/h                                       |

## Key Features

- ✓ Telescopic and folding legs
- ✓ Tested barrier between falling items and people walking underneath
- ✓ Lip to hold any fallen debris
- ✓ Anchorage system to connect units tightly together
- ✓ Quick collapse, stack and store
- ✓ Easy to stack and transport between jobs
- ✓ High visibility side bars if required

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

## Safely Protect and Catch

Made from aluminium, the Pedestrian Tunnel is height adjustable to reduce the impact of accidentally falling items and catches them from up to 25m above.

# NON-CONDUCTIVE PLATFORM EDGE PROTECTION

Specifically designed for railway platforms, eliminating the risk of falling from platforms and coming into conflict with moving plant, machinery or trains.

The Platform Edge Protection Barrier enables a much safer working environment and reduces potential risk of injuries on and around the platform.

The barrier provides enough strength to the lateral force of someone falling against it and onto the tracks, therefore preventing serious injury and even death.

 High Impact

 Non Conductive

## Specifications

**Size:** Each Pole: 2.4m [L] x 38mm [Diameter]  
Aluminium Clamp: 260mm [L] x 550mm [H]  
Post: 1.0m [L] x 50mm [Diameter]  
Kick Board: 2.0m [L] x 110mm [W]

**Weight:** 1.5Kg / 5Kg / 3Kg / 4.4Kg

**Material:** Posts, poles and toe boards made from Pultruded Glass Reinforced Plastic – Non Conductive

**Colour:** Hi-visibility yellow poles and kickboard

## Key Features

- ✓ Reduces plant/person interference and fall prevention risk on railway platforms
- ✓ Comes with clamp and chain pins
- ✓ Non-conductive, resistance to corrosion
- ✓ High impact resistance
- ✓ Lightweight, easy to transport and install
- ✓ Extensive life span
- ✓ Approved and tested to European Standards

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Hire for short or long term**
- **Buyback**

## A Perfect Solution!

With the growth in passenger numbers expected to rise, it means that the UK's railway infrastructure will need to deliver major investment programmes in railway protection safety. This is where our Platform Edge Protection provides a perfect solution and preventative measure.

# SIGNBLOK

A revolutionary alternative to regular sandbags to be used as a ballast block for a temporary utility or traffic sign.

Stackable

1.6Kg

Water/Sand filled

SignBlok has a true and constant weight, this allows for improved sign stability. It can be filled with sand or water which also enables the product to split and disperse of material if it were to be hit by a vehicle.

## Specifications

|                  |  |
|------------------|--|
| <b>Size:</b>     | 530mm [L] x 220mm [H] x 230mm [W]  |
| <b>Weight:</b>   | 1.6Kg when empty / 18Kg when filled with sand / 15Kg when filled with water                          |
| <b>Material:</b> | 100% High Density Polyethylene recycled plastic, which is 100% recyclable                            |
| <b>Colour:</b>   | Hi-visibility yellow as standard. Option for corporate colours (subject to a minimum order quantity) |

## Key Features

- ✓ Improved sign stability
- ✓ Extensive life span
- ✓ Aids wind loading
- ✓ Supplied as an empty mould with the ability to be filled by the contractor with water or sand
- ✓ Easy to handle
- ✓ No need to re-fill or dispose of materials
- ✓ Can be stacked together, easy and cheap to transport

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term
- Used/second hand
- Buyback
- Lease or Finance

## Additional Information

 [Product Leaflet](#)

## Effective Securing Clamp

The SignBlok can be easily clamped to the cross brace on most signs. It's securing clamp also helps prevent ballast movement in strong winds.

## **TRENCH COVERS & FOOTBRIDGES**

Our range provides safe access for pedestrians during remedial and new groundwork projects, where the areas of work impinge on footpaths and pedestrian areas.

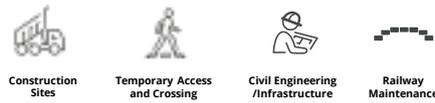

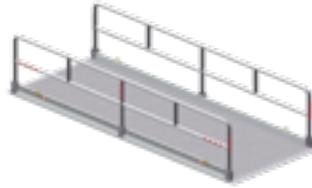

## Elite TrenchCross®

The Elite TrenchCross is a temporary solution for safe work, pedestrian and light vehicle access, whilst working over and around excavations and open trenches.

## Elite Footbridge

The Elite Footbridge provides safe work and public access when working over and around deep excavations, small rivers, streams and utility trenches.

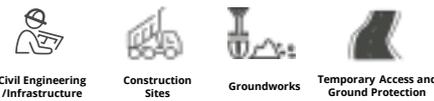

## Kerb Buddy

Kerb Buddy is a blow moulded curb ramp that provides easy access to varied street levels for utility works.

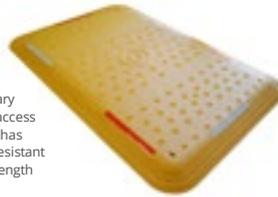

## TuffCover

TuffCover is a lightweight temporary manhole cover solution designed to fit over a standard-sized manhole, allowing access of heavy machinery without concern.

## Tuff Trench

Tuff Trench is a temporary solution for pedestrian access over excavations, which has extremely high impact resistant and is designed with strength and safety in mind.

## GRP Trench Covers

The GRP Trench Covers provide safe access during utility and groundwork projects, where the areas of work impinge on footpaths and pedestrian areas.

# ELITE TRENCHCROSS®

A temporary solution for safe work, pedestrian and light vehicle access, whilst working over and around excavations and open trenches.

This strong but lightweight Elite TrenchCross system provides a solution allowing access around excavations (limits apply).

The Elite TrenchCross provides superior weight loading capabilities compared to all other products.

-  **500/1000Kg**
-  **19/23Kg**
-  **Varied sizes**

# ELITE FOOTBRIDGE

Provide safe work and public access when working over and around deep excavations, small rivers, streams and utility trenches.

The Elite Footbridge is a robust and lightweight solution for temporary bridging requirements. The system includes a unique 'diamond traction', non-slip surface, foldable handrails and lift handles for quick assembly, easy handling and transportation.

-  max 850-1850Kg
-  72-207Kg
- 
-  Multiple sizes

## Specifications

|           |  |
|-----------|--|
| Size:     | 2m / 3m / 4m / 6m [L] x 1.3m [W] x 0.16m [D]   |
| Weight:   | 72Kg / 110Kg / 142Kg / 207Kg   |
| Load:     | Weight tested up to 1850Kg / 1750Kg / 1500Kg / 850Kg (depending on ground/trench conditions) |
| Material: | Aluminium  |

## Key Features

- ✓ Temporary pedestrian access over excavations
- ✓ Diamond traction non-slip surface, safe in all weather
- ✓ Folding anodised handrails
- ✓ Lift handles/hooks for quick assembly
- ✓ High toe kickboard and access ramps
- ✓ Low cost to transport
- ✓ Can be stacked securely for storing
- ✓ Lightweight aluminium, yet extremely strong

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

**Risk Assessment needs to be carried out before installation. Criteria to be adhered to.**  
Please note that this product is for pedestrian use only.

# KERB BUDDY

**A blow moulded curb ramp that provides easy access to varied street levels for utility works.**

A lightweight and durable design with an anti-slip pattern. The Kerb Buddy has been manufactured to reduce the risk of tripping with it's low profile edges on the front and back. In addition, pedestrian safety is improved through it's extra high sides and provides extra safety for wheelchair users.

-  **250Kg**
-  **8Kg**
-  **Stackable**
- 

## Specifications

|                  |   |
|------------------|---|
| <b>Size:</b>     | 1200mm [W] x 985mm [D] x 90mm [Wall Height]<br>Kerb height: Minimum 75mm and maximum 125mm      |
| <b>Weight:</b>   | 8Kg   |
| <b>Load:</b>     | Withstands over 250Kg   |
| <b>Material:</b> | 100% High Density Polyethylene, which is 100% recyclable  |
| <b>Colour:</b>   | Hi-visibility yellow as standard. Other colours available (subject to a minimum order quantity) |

## Key Features

- ✓ Efficient anti-slip pattern
- ✓ 4 fixing holes, can be bolted to the ground
- ✓ High impact resistance (does not shatter)
- ✓ Low edges for anti-trip
- ✓ Ideal as a wheelchair and pushchair ramp
- ✓ High rise sides to prevent falls
- ✓ Handles for easy lifting
- ✓ Can be placed at various curb heights
- ✓ Conforms to National Grid T/SP/E/42 and Safety at Street Works and Road Works - A Code of Practice 2013

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Hire for short or long term**
- **Used/second hand**
- **Buyback**

## Stackable

Our Kerb Buddy can be easily stacked to allow for efficient storage and transportation.

# TUFFCOVER

A lightweight temporary manhole cover solution designed to fit over a standard-sized manhole, allowing access of heavy machinery without concern.

TuffCover is a safe and reusable solution for covering manholes during Construction and ensures that no dirt or debris can fall into the system.

## Specifications

|           |   |
|-----------|---|
| Size:     | 750mm [L] x 750mm [W] x 79mm [D]  |
| Weight:   | 12Kg  |
| Load:     | Weight tested up to 4 tonnes central loading point (depending on ground conditions) |
| Material: | Contains engineering plastics with nylon-6 PA22 10G3                                |
| Colour:   | Maroon  |

## Key Features

- ✓ Safe and reusable
- ✓ Fits over a standard-sized manhole
- ✓ Quick and efficient Installation
- ✓ Reduced chances of theft; key required for removal of the system
- ✓ Easy to store and transport
- ✓ Prevents drain blockage

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- Hire for short or long term

# SITE SECURITY & STORAGE SOLUTIONS

Our range of products are extremely robust, secure, efficient and will serve protection for your materials and goods as a perfect use within construction sites, factories and vehicles.

## Elite FlamBank™

A durable storage solution that keeps hazardous chemicals and flammable materials safe and secure.

## Elite OxBox™

A dependable, durable storage solution that keeps worker's tools safe and secure.

## Elite RubbleTruck™

A durable and heavy duty barrow designed to carry materials or rubbish for a safer and more efficient workspace.

## Elite TuffBank™

A durable and reliable storage solution for safely securing equipment, which is virtually impossible to break into.

**A durable storage solution that keeps hazardous chemicals and flammable materials safe and secure.**

The Elite FlamBank is extremely robust and secure with 5-lever deadlocks on both sides. It is compliant with regulations imposed from the Control of Substances Hazardous to Health (COSHH) to ensure that exposure of chemicals is very minimal.

-  **Vehicle & Personnel Safe**
-  **Deadlocks**
-  **30 mins resistance**
-  **Ventilated**

### Specifications

|                  |  |
|------------------|--|
| <b>Size:</b>     | 7 sizes are available  |
| <b>Weight:</b>   | Depending on size choice – see our website or product leaflet  |
| <b>Locking:</b>  | 5-lever deadlocks both sides, with heavy-duty Chubb-style keys, welded security ID numbers and 6mm reinforcement around the lock |
| <b>Material:</b> | Powder coated robust Steel Plate   |
| <b>Colour:</b>   | Bright red – compliments hazard warning sign   |

### Key Features

- ✓ Strong gas struts and safety catch
- ✓ Fully welded and tested sump base to help prevent leakage
- ✓ Ventilation to prevent build-up of fumes
- ✓ Complies to all relevant COSHH regulations
- ✓ Flame arrester gauze fitted on all ventilation
- ✓ Hazardous substances are securely protected 24/7
- ✓ Add castors using pre-drilled holes

### Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Lease or Finance**

### Additional Information

 **Product Leaflet**

### A Secure Solution

The Elite FlamBank is ideally used by construction workers because of its ultra-tough, lockable vault for storing hazardous chemicals and flammables.

Should you require security of hazardous substances on site, in factories and in vehicles, then the Elite FlamBank is compliant and regulated to do that.

# ELITE OXBOX™

**A dependable, durable storage solution that keeps worker's tools safe and secure.**

The Elite OxBox is a medium duty tool vault, alike to the Elite TuffBank, with extremely robust and secure 5-lever deadlocks.

It is a cost effective design where budget is a consideration, with no compromises on quality.

- 
-  **Deadlocks**
-  **Budget**
-  **Mobility**

## Specifications

## A Secure Solution

The Elite OxBox is ideally used by construction workers because of its ultra-tough, lockable vault that conforms to industry standards.

Should you require tidy tool' storage on site, in factories and in vehicles, then the Elite OxBox has a unique 'folded' construction to do that.

# ELITE RUBBLETRUCK™

A durable and heavy duty barrow designed to carry materials or rubbish for a safer and more efficient workspace.

No longer dedicate your time picking waste up at the end of your project. Instead have the Elite RubbleTruck, a handy companion, to assist you handling waste and rubble all the way through the day.

-  **750Kg load**
-  **400L**
-  **88.5Kg**
-  **Quick-fit bolt**
-  **Stackable**

## Specifications

|           |   |
|-----------|---|
| Size:     | 1460mm [L] x 760mm [W] x 855mm [H]                    |
| Weight:   | 88.5Kg  |
| Castors:  | 1x quick-fix bolt on heavy-duty castor, 2 x linchpins |
| Material: | Powder coated robust Steel                            |
| Colour:   | Charcoal grey (RAL 7021)                              |

## Key Features

- ✓ Durable, heavy duty and robust construction using 2mm steel
- ✓ Extra strength crane lifting eyes
- ✓ Solid rubber, puncture proof wheels
- ✓ Rubber side protection buffers
- ✓ Optional lid to prevent debris falling out and increases capacity by 160L
- ✓ In-built tipping feature

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Lease or Finance**

## Additional Information

 **Product Leaflet**

## A Tidy Workspace

The Elite Rubble Truck is ideally used by construction workers because of its ergonomic design for maximum performance and efficiency.

Should you require clutter free areas and security on site, then the Elite Rubble Truck is an indispensable companion.

# ELITE TUFFBANK™

A durable and reliable storage solution for safely securing equipment, which is virtually impossible to break into.

The Elite TuffBank sets the industry benchmark for quality and is great value for money too.

With a host of features, the choice of eight sizes and optional extras, the range of Elite TuffBank's have undertaken rigorous police test standards to make it an ultimate design for many job types.

 Reinforced protection

 Security Police test

 Easy lift and move
