

OVERVIEW

uTRAC is an award winning Workforce Management Application, designed for the management of high-volumes of contingent labour. Businesses can use uTRAC to centrally manage and monitor their entire workforce across multiple locations, including their in-house employees, freelance labourers and teams supplied by agencies.

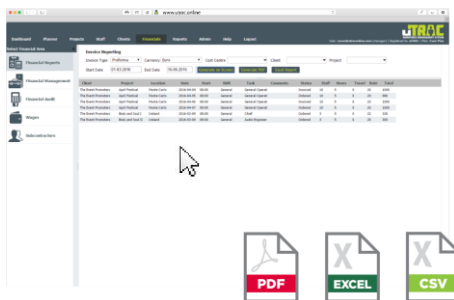

Simpler Scheduling

uTRAC's easy to use **Drag & Drop** scheduling interface is ideal for organizing your teams for multiple projects allowing managers to adapt quickly to changing staffing demands, **Avoid Double Booking**, and **Track Project Costs** as they schedule.

Faster Staff Bookings

With improved communication with your staff, you can book staff and freelancers for upcoming projects in no time. Send requests via **Email or SMS** and allow staff to log into the **Staff Portal** to confirm their availability to work. uTRAC also allows you to **Post Open Shifts** to the Job Board for staff to confirm their availability for upcoming events.

Painless Billing and Payroll

Our comprehensive financial reporting facilitates billing & payroll in minutes. **Print Client Ready Quotes and Invoices** that are traceable in an instant and complete your week's **Payroll at the Click of a Button**.

Streamlined Time & Attendance

Record workforce attendance in real-time using our **Online Timesheets** module. uTRAC also utilises mobile **Barcode Reading and Biometric Scanning** technology for attendance tracking on the go.

TESTIMONIALS

The first noticeable benefit for my job was the improved communication between the office and our crew. Getting everyone into place is a lot more manageable and stress free.

Ray O'Brien. Operations Manager, Event Services Ireland

uTRAC is built around the way I need to manage jobs and is very user friendly. Recording all the hours that people are working is extremely straight forward.

Joe Grogan. Project Manager, Aiken Promotions

uTRAC was such as seamless transition from our old way of doing things and we were using their app to schedule up to 2,500 man hours each week in no time.

Sven Knight. Managing Director, Knight Rigging Services

We dedicated a lot of research into finding a solution that was right for us and finally decided that uTRAC was the best fit. Not only does uTRAC offer the type of flexibility required for a security company, their team provided hands on support to ensure we successfully implemented the system across our different branches.

Diarmuid Smyth. Managing Director, Sword Security

The go-to workforce management application for the event services industry

- ✓ Shift Grouping

Return on Investment

One of the most instantly noticeable benefits uTRAC subscribers can achieve will be the reduction of time and resources required to complete complex financial processing.

Because all hours worked by remote staff can be accurately recorded by uTRAC's online scheduling system, there is no requirement for double data entry to complete billing and wages processing. The resulting efficiencies offer real return to our clients.

Case Study

Event Services Ireland (ESI) are one of the leading suppliers of personnel to the corporate and entertainment events industry in Ireland.

They have experienced a significant improvement to their administrative workflows since moving their scheduling to uTRAC from an excel based system.

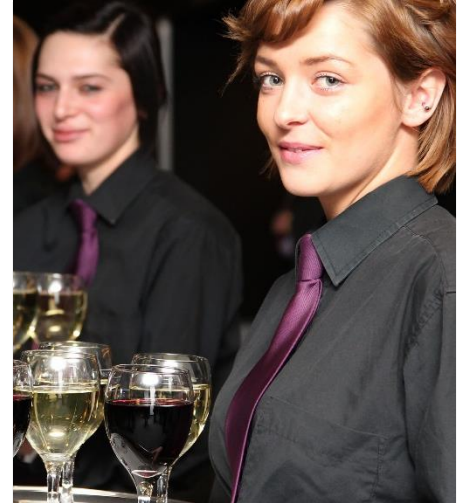

Time savings for event services Ireland.

Previously we would be using multiple excel spreadsheets to manage and schedule our staff. I would then have to compile these documents and translate them into formal wage slips. Using uTRAC has more than halved the time I spent managing wages every week.

Elaine Dillon, Payroll Administrator, **Event Services Ireland**.
