## Power Tracks 60 / SignaRoad

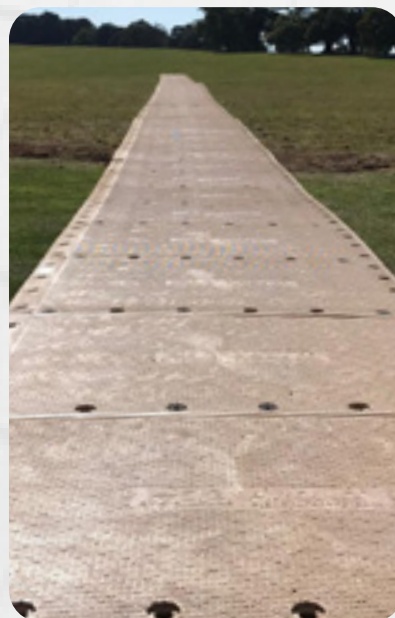

Power Tracks 60 and SignaRoad are heavy duty trackway made from tough recycled & recyclable HDPE plastic and ideally suited to provide sturdy temporary roadways and ground protection for heavy machinery such as diggers, dumpers and heavy lorries.

Due to their weight, Power Tracks 60 must be installed using a suitable and certified lifting appliance and we supply a full nationwide installation service.

- **Load capacity to 150 tonne**
- **Panel Size 1.88m x 3m x 64mm**
- **Panel Weight 225kg**
- **Material HDPE Recyclable**
- **Used for up to Heavy machinery and plant**
- **Used for roadways and pads**
- **Alternative to Aluminium**

**Suitable For:**

**Heavy Duty temporary roadway for heavy traffic and plant machinery.**

**Recycled water is used for washing all panels**

## Power Tracks 20

The Power Tracks 20 temporary vehicle trackway system is made from tough recycled and recyclable HMPE plastic and ideally suited to provide sturdy temporary roadways and ground protection on both hard and soft surfaces.

Power Tracks 20 can be positioned and laid by hand without the need for forklifts or machinery. Each panel is laid side by side and connected via our specially designed two-way joiners and top screws and bolts which are supplied.

- **Load Capacity 38 tonne**
- **Panel Size 3m x 1m x 20mm**
- **Panel Weight 56kg**
- **Material HMPE Recycled and Recyclable**
- **Used for up to medium duty machinery and plant**
- **Used for roadways and pads, car parks**
- **Laid quickly by 2 labourers**

**Suitable For:**

**Medium duty temporary traffic roadway for light vehicles.**
