

Our Core Services

Live

Our productions team has the expertise to help you materialise your event as you imagine it and the knowledge to help you navigate through the shift in the events industry. We provide completely bespoke solutions to meet the specific requirements of each event thanks to our wide range of stock, consisting of PA systems, staging, lighting, rigging and video equipment.

We provide an end to end service including:

- Audio
- Lighting
- Video
- Staging
- Set
- DJ equipment

Online

Providing high quality online content has rapidly become commonplace and will remain a part of our daily work environment. Whether you're running an awards night, a conference or live performance, we can bring it online! Our video production rack is a full production studio housed within a flight case which allows us to roll into a venue and stream your event worldwide.

We provide an end to end service including:

- HD Streaming
- Vision Mixing
- Cameras
- Video Editing
- Network & Power Redundancies

Install

We offer a complete commercial AV installation service expertly tailored to your exact requirements, perfect for those looking to upgrade or install a new A/V system for a business or organisation. We also ensure that the system is sufficiently adaptable to be able to incorporate future advances in technology, as well as providing servicing and maintenance.

We provide an end to end service including:

- System Design
- High Quality Equipment
- Installation
- Operation
- Maintenance
